Week 6
Module 1
Lecture 31

Communication Skills

Dr. T. Ravichandran
Professor of English
Department of Humanities and Social Sciences
The Indian Institute of Technology, Kanpur, India

Effective
Communication

Highlights

Highlights of the Last Lecture

Focussed on E-Mail Etiquette

Writing sensible mails by eliminating bad writing habits

Plan what you should write, note down, make a draft

Be clear, concise and coherent

Extra time should be spent on **checking the spelling, grammar and typographical errors, inserting emoticons, and making use of punctuation marks**

Use a descriptive subject line, never leave it empty!

Write only short and focused e-mails.

Avoid repeating Re: Re: Re: in replies

Never type the body in FULL CAPITAL LETTERS!

Never reply ALL or randomly CC all!

Use only well-known and common abbreviations

Keep an eye on the computer clock!

Look at this . . .

An Effective Communicator
Will Emerge As
A Natural Leader!

Developing Soft Skills & Personality

Dr. T Ravichandran

People prefer to be followers!

- Many people are comfortable if somebody can think clearly, speak on their behalf, and communicate effectively for them—
- That somebody could be a relative, friend, neighbour, a teacher, a mediator, a lawyer, a mentor, a leader ...
- I call that somebody an Effective Communicator!
- An effective communicator is always in demand!
- Make yourself an effective communicator is imperative for developing your soft skills and personality!

Significance of Communication

- The success of a leader, manager, teacher, or any professional depends on their **ability to communicate.**
- Communication failures are costly. (leads to ill-feeling among workers, causes strikes, affects productivity)
- People will give their best only if the communicated message is clear to them.

Just think about this...

“Half the world is filled with people who have something to say and cannot say it and the other half, of people who have nothing to say and keep on saying it”

~ Robert Frost

Now, Consider this . . .

“Much unhappiness has come into the world because of bewilderment and things left unsaid.”

~ Fyodor Dostoyevsky

All of us communicate...

- World has shrunk into a global village
- You connect at the touch of a button!
- Communication is easy— anytime, anyhow, anywhere!
- But is it always effective?

Developing Soft Skills & Personality
Dr. T Ravichandran

Think about this...

The difference between the almost right word and the right word is really a large matter—it's the difference between the lightning bug and the lightning.”

~Mark Twain

Developing Soft Skills & Personality
Dr. T Ravichandran

Communication versus Effective Communication

- Knowing the difference between the almost right word and the right word amounts to being just a communicator and an effective communicator!
- Does it really matter?
- Look at the following example to understand how one's attempt to create a good impression can actually result in the opposite due to lack of clarity in communication.

Hey, Do you know that your father's genes can give you diabetes?

Stupid!

I don't wear my father's Jeans?

Communication—A Complex Interactive Process

- Involves shared assumptions and unspoken agreement between individuals
- So frequent errors and misunderstandings are quite possible!

Effective Communication . . .

- Is your ability to cause the intended and desired response
- It is your ability to influence people, their ideas and thought patterns, which govern their actions.
- Effective Communication will give you sustained success in all walks of life!

We communicate 24 X 7

- Communication has become the basis of our lives; it surrounds us, protects us, changes us, reveals us, identifies us, makes us happy, makes us sad . . .
- We are permeated by all media of communication
- Communication: An exchange of ideas, thoughts and feelings between two or more entities.
- We communicate our thoughts and feelings to family, friends, co-workers, and friends every hour of every day!
- *We cannot stop communicating!*

But do we communicate effectively?

Ineffective Communication: An Example

Hello, Please deliver a spicy chicken

After Delivery

Oh, no I didn't want a spiky chicken!

Effect of IEC: misunderstanding, didn't convey the intended message

The single biggest problem in
communication is the illusion
that it has taken place.

Dr. T Ravichandran

~ George Bernard Shaw

Components of Communication

- Communication is a two way *process*. One person [*sender*] transmits the *message* and the other person receives [*receiver*] it.
- The transmission is done through a *channel*
- The language or code used to convey the message is called *medium*
- The receiver sends back a *response*.
- The observation of the receiver's response is called *feedback*.

Dr. T Ravichandran

The Communication Process: Basic Model

The Communication Process Expanded Model

Communication Process

Simple Model: Ask 5 WH questions

- Who sends? *[Sender]*
- Whom does he send? *[Receiver]*
- What does he send? *[Message]*
- Which medium? *[Channel]*
- What effect? *[Response/Feedback]*

Developing Soft Skills & Personality
Dr. T Ravichandran

***Who sends what to whom through
which channel with what effect?***

Effective Communication

- EC occurs only when the message and its subtext are fully and completely acknowledged and responded to.
- Feedback could be in the form of an acknowledgement, an action, or a verbal reply.
- This is the deciding factor in any communication's effectiveness.

Components of Effective Communication

1. Conciseness & Clarity

Don't say, "That homo sapien yearned for dihydrogen oxide."
Just say, "That man wanted water."

2. Conviction & Confidence

"No tears in the writer, no tears in the reader." ~ Robert Frost
It's your passionate involvement and the way you put it will convince your audience.

Components of Effective Communication

3. Genuineness & Interest

Be genuinely interested in the subject matter to cause enthusiastic response from your receiver.

4. Empathy and Timing Sense

Respect your audience; treat them with courtesy & politeness.

Be sensitive to the utility of their time.

Make listening to you a worthwhile experience.

5. Brevity and Effectiveness

“Brevity is the soul of wit.” ~ Shakespeare

Be as brief as possible if you want to heighten effectiveness in your communication.

Types of Communication

- Verbal: spoken word, structured language form between two or more entities; dialogues, meetings, debates, presentations
- Non-verbal: body language, gestures, facial expressions, pictorial representations, sign language
- Communication is more than mere words. To understand a message completely, we have to not only understand *what* is being said, but also *how* is being said.

Dr. T Ravichandran

Effective Communication is a seamless blend of both verbal and non-verbal aspects of communication

Is this Effective Communication?

Woman without her man is nothing

- Woman, without her man, is nothing.

Developing Soft Skills & Personality

- Woman, without her, man is nothing.

Is this Effective Communication?

Kill him not leave him.

- Kill him, not leave him.

Developing Soft Skills & Personality

- Kill him not, leave him.

*The way we communicate with
others and with ourselves
ultimately determines
the quality of our lives.*

~Tony Robbins

Dr. T Ravichandran

Developing Soft Skills and Personality

Week 6
Module 2
Lecture 32

Dr. T. Ravichandran
Professor of English
Department of Humanities and Social Sciences
The Indian Institute of Technology, Kanpur, India

Barriers to
Communication

Sender/Receiver's Personality

Highlights

Highlights of the Last Lecture

Focussed on Effective Communication

An effective communicator will always leads.

People will be happy if they are able to communicate effectively.

Communication is a complex interactive process involving shared assumptions and unspoken agreements!

Frequent miscommunications are possible!

EC is your ability to cause the intended and desired response.

Basic communication process: ***Who sends what to whom through which channel with what effect?***

Components: ***Conciseness & Clarity, Conviction & Confidence, Genuineness & Interest, Empathy and Timing Sense, Brevity and Effectiveness.***

The Communication Process Expanded Model

Barriers

- Things which are *obstacles* to effective communication.
 - Anything that *impedes* free flow of ideas
 - Something that *prevents* active listening and careful response
 - These barriers act as **physical, mental, emotional, psychological blocks** and result in failure of communication and/or miscommunication.
- 
- Developing Soft Skills & Personality
- Dr. Parikshit Kumar

Barriers to Communication

- 1. Arising from Sender/Receiver's personality
- 2. Interpersonal Transactions

Developing Soft Skills & Personality

Dr. T Ravichandran

Encoding/Decoding (sender/receiver)

- Sharing of a common code; language common frame of reference—

e.g.: “Short circuit at office;
please send an electrician”

(spy stories)

- “My partner is kidnapped;
Send someone for my help.”

Sender/Receiver

- Sender- not clear objective or inapp of language

- e.g., the real incident

American tourist (h
occupation: 'none')

Sender/Receiver

- Receiver-unable to understand & interpret the message properly
- e.g., the teacher who demonstrated the evils of drinking liquor to his students

Developing Soft Skills & Personality
Dr. T Ravichandran

1. Personality Barriers

Psychological in nature

People tend to take for granted
“the commonality” in communication.

- Difference in backgrounds are overlooked
- Difference in perception is ignored

Developing Soft Skills & Personality

Dr. I. Ravichandran

1. Personality Barriers ...

Example: *Bronislaw Malinowski's encounter with an old cannibal (II WW)*

Cannibal: How the Europeans managed to eat the quantities of human flesh produced by massive killings.

Malinowski: Europeans never ate the flesh of the enemy they killed.

The cannibal was shocked. “What kind of barbarians are you,” he asked in horror, “to kill people without any real object.”

1. Personality Barriers ...

- **Factors that contribute to one's perspective:**
the socio-cultural milieu one has grown up in,
one's interpersonal experiences, temperament,
personality, ideas and values, position in life,
religious and political beliefs, etc. . .
- **The position we hold gives us a certain perspective
which makes it difficult to understand others with
different outlook.**
Father/Son, Teacher/Student, Senior/Junior,
Mother-in-law/Daughter-in-law, Manager/Worker,
Husband/Wife, etc...

Anecdote: “My wife’s hearing...”

1. Personality Barriers

- Tendency to Stereotype and Jump to conclusions

Categories: **Nationality** (Indian, Pakistani, Chinese, American); **Religion** (Jew, Parsi, Hindu, Muslim, Christian); **Race/Colour** (Black-Negro, White-European); **Work** (Professor, Businessman, Smuggler, Rickshaw-puller, Sweeper, Beggar); **Food** (Vegetarian, Non-vegetarian); **Education** (IITian, Govt. college student; 10 pointer, 5 pointer) and so on

Developing Soft Skills & Personality
We deny them individuality.

Dr. I. Ravichandran

We interpret within the framework of a stereotype the symbols these individuals display.

1. Personality Barriers

- R Rigidity of thought blurs the power of discrimination

People who neither learn from new information nor accept any contradictory view.

- Also, know-it-all's

Developing Soft Skills & Personality

Words like *all, always, everybody, none, never, nobody.*

Overcoming Strategies

- ✓ Developing **Empathy**: willingness to recognize someone's situation; accept his/her point of view without prejudice; being non-judgmental, open to receive contrary thoughts and ideas

An understanding of the psychology of man

An awareness of the differences in background, perception, point of view

- ✓ **Analysis of one's verbal & non-verbal behaviour**

Developing relevant personality traits

- ✓ **Not allowing stereotypes to cloud judgement**

- ✓ **Looking at the things from other's perspective**

e.g. Steven Covey's paradigm shift (New York subway car)

(Ref.: W1:M3: L3: Human Perceptions)

Use Empathy/Be Expressive

“Keep me away from the wisdom which does not cry,
the philosophy which does not laugh
and the greatness
which does not bow
before children.”

~Kahlil Gibran

Developing Soft Skills and Personality

Week 6
Module 3
Lecture 33

Dr. T. Ravichandran
Professor of English
Department of Humanities and Social Sciences
The Indian Institute of Technology, Kanpur, India

Barriers to
Communication

Inter-Personal Transactions

Highlights

Highlights of the Last Lecture

Barriers to Communication

Barriers act as **physical, mental, emotional, psychological blocks** and result in failure of communication.

Barriers arising from Sender/Receiver's personality

- **Encoding/Decoding level** Sharing of a common code; language common frame of reference.
- Sender—not clear about his/her objective or inappropriate use of language
- Receiver-unable to understand & interpret the message properly
- Personality barriers are Psychological in nature: People tend to take for granted “the commonality” in communication. Difference in backgrounds are overlooked
Difference in perception and the factors which cause barriers were discussed.
- Overcoming strategies such as use of empathy.

Barriers to Interpersonal Transactions ...

➤ Limited frame of reference

- Lack of Language Skills/Common Knowledge
Use of slang, jargon—
e. g. Can you *burn* it for me?

➤ Emotional interference

Emotional Reactions, negative attitudes,
& wrong timing

- Display of intense emotion is likely to distort the message (love, hatred, jealousy, anger, joy, sorrow)

Emotional Barriers

- Hidden/open emotional gestures are culturally given
- But– negative emotions act as barriers
- Fear, apprehension, misgiving
- Anger, bitterness, hatred, jealousy
- Suspicion, disbelief, distrust
- Anxiety, low self-esteem, distress, stress
- Fatigue, ill-health, pain, disability

Barriers to Interpersonal Transactions ...

- **Emotional interference...**
- Negative emotions interfere more than positive ones
- *Attitude* (threatening/domineering) makes the receiver defensive.
- He is likely to misinterpret, ignore or overreact to the messages

Developing Soft Skills & Personality

Dr. T Ravichandran

Language Barrier

- Words with two meanings;

Same letters, different pronunciation and meaning:

- No one could believe how much **produce** our garden could **produce**.
- They were going to **project** the **project** at the local theatre.
- The band booked the studio to **record** their **record**.
- The bandage was **wound** around the **wound**.
- We must **polish** the **Polish** furniture.
- Since there is no time like the **present**, he thought it was time to **present** the **present**.
- I spent last **evening** **evening** out a pile of dirt.

Barriers to Interpersonal Transactions...

➤ Overcoming Strategies

- ✓ **Angry tone**—
Lowering of voice, maintaining calmness
- ✓ **Sender should show concern; gain trust and establish credibility in the eyes of the receiver**

Done through consistent & predictable behaviour

Fear of change—removed through education and familiarization

- ✓ **Wrong timing**—selection of the best psychological moment

Language Barriers

- The same words can mean different things in different cultural contexts to different language speaking people
- E.g. **Coca-Cola** in China was introduced as **Ke-kou-ke-la**. In Chinese it means "bite the wax tadpole" or "female horse stuffed with wax" depending on the dialect. Later—changed to: "**ko-kou-ko-le,**" "**happiness in the mouth.**"

Lost in Translation!

- Often the real meaning is lost in translation!
- E.G.: General Motors introduction of the **Chevy Nova** in South America
- It was not selling any cars until it found out that "no va" means "it won't go."
- Renamed the car in its Spanish markets to the **Caribe**. [cah-ree'-bay]

Overcoming Strategies

- When you use an ambiguous/polysemous word, make the context very clear
- Try to understand any cultural variation in pronunciation that might cause miscommunication
- While speaking, correlate your intentions with positive non-verbal gestures
- Seek the help of a translator, native speaker as and when required

Developing Soft Skills & Personality

Dr. P. Ravichandran

Overcoming strategies

- ✓ Ask questions, seek clarifications (never presume your communication meaning is easily understood).
- ✓ Be clear and precise about your message; use repetition; summarize; paraphrase; ask somebody to summarize.
- ✓ Listen carefully & patiently; don't interrupt even if somebody criticizes you.
- ✓ Reflect back on criticism, make the critic feel understood.

Technology Barrier!

The Day That Albert Einstein Feared Has Arrived!

Having coffee with frens

A day in a beach

Cheering your team

Out on an intimate date

Enjoying the sights

Having dinner

"I fear the day that technology will surpass our human interaction. The world will have a generation of idiots"

Albert Einstein

Overcoming Strategies

- ✓ Use technological aids for communication to the minimum.
- ✓ Use appropriate media (**spoken, written, non-verbal**) and channel (**face-to-face, one-to-one, one to group, telephone, radio, tv, letters, e-mail, sms**)
- ✓ If you can use face-to-face communication, do not send SMS/E-Mail.
- ✓ Avoid overuse (sending too many/long e-mails; long phone calls); misuse (asking confidential matter using SMS); Using FB/What'sapp inappropriately.

“Communication is a skill that you can learn.
It's like riding a bicycle or typing.
If you're willing to work at it,
you can rapidly improve the quality
of every part of your life.”

Developing Soft Skills & Personality
– Brian Tracy
Dr. T. Ravichandran

Developing Soft Skills and Personality

Week 6
Module 4
Lecture 34

*Dr. T. Ravichandran
Professor of English
Department of Humanities and Social Sciences
The Indian Institute of Technology, Kanpur, India*

Barriers to
Communication

Miscommunication

Highlights

Highlights of the Last Lecture

Barriers to Communication

Interpersonal Transactions

Limited frame of reference

Emotional interference

*Overcoming strategies: Removing fear of change,
Choosing the right psychological moment.*

Various types of language barriers:

Same words, different cultural meanings

Same letters, different grammatical meanings

*Overcoming strategies: Making the context clear,
using nonverbal correlatives, seeking clarifications*

Technological Barrier

*Overcoming strategies: Use of appropriate medium,
avoiding excessive/misuse of media.*

What is Miscommunication?

- Communication is **action/transaction**, and thus miscommunication can be viewed as instances of **action/transaction failure** (when the speaker fails to produce the intended effect).
- **Misperception** (when the hearer cannot recognize what the speaker intended to communicate), or both.

Communication Flowing Through Formal Channels

Downward

Management directives

Job plans, policies

Company goals

Mission statements

Horizontal

Task coordination

Information sharing

Problem solving

Conflict resolution

Upward

Employee feedback

Progress reports

Reports of customer interaction, feedback

Suggestions for improvement

Forms of Communication Flowing Through Formal Channels

Written

Executive memos, letters
Annual report
Company newsletter
Bulletin board postings
Orientation manual

Oral

Telephone
Face-to-face
conversation
Company
meetings
Team meetings

Electronic

E-mail
Voicemail
Instant
Messaging
Intranet
Video-
conferencing

Barriers to Information Flow in Organizations

- Closed communication climate
- Administrative hierarchy—horizontal/vertical flow
- Long lines of communication
- Too many transfer stations distorts and delays the message
- Lack of trust between management and employees
- Employees turn to an informal system—grapevine
- Competition for power, status, rewards

Developing Soft Skills & Personality

Pre-Thinking Assessment-1

Highlights

Highlights of the Last Lecture

Miscommunication

Misperception; instances of action-transaction failure.

Communication flowing thorough formal channels:

Downward, Horizontal and Upward.

Forms of Communication Flowing Through Formal Channels: **Written, Oral and Electronic**

Barriers to information flow in organisations:

Administrative hierarchy, long lines of communication, too many transfer stations, lack of trust, etc.

Looked at Illustrative Examples for

1. Message Distortion in Downward Communication
2. Miscommunication in Product Evolvemement

Pre-Thinking Assessment-1

Objective

To Check your existing knowledge about body language

Developing Soft Skills & Personality

Dr. T Ravichandran

To clear certain misconceptions about non-verbal communication

True or False

QUESTIONS

Developing Soft Skills & Personality
Dr. R. Ravichandran

True or False

1) Women have natural sensitivity towards body language than men.

2) A dishonest person avoids eye contact.

Developing Soft Skills & Personality
Dr. T Ravichandran

3) The more space a person occupies, the more power he enjoys.

4) Sitting lower than the other person with whom you are interacting indicates dominance or authority.

Developing Soft Skills & Personality
Dr. T Ravichandran

5) One shows traits of aggressiveness while sitting with his legs on a desk with his hands clasped behind his head, especially before someone.

6) Crossing the hands, legs or the ankles is a defensive gesture.

Developing Soft Skills & Personality
Dr. T Ravichandran

7) Steepling with the fingers and hands show confidence.

Developing Soft Skills & Personality

Dr. T. Ravi Chandran

8) Smoking a cigarette, especially before an interview or such activity, is considered a sign of anxiety or nervousness.

Developing Soft Skills & Personality
Dr. T Ravichandran

9) Resting your head in the palm of your hand indicates interest in the subject.

Developing Soft Skills & Personality
Dr. T Ravichandran

**10) Showing your thumbs up
indicates a successfully
completed job or victory.**

Developing Soft Skills & Personality
Dr. T Ravichandran

Babies . . .

11) Babies are more sensitive to body language than adults.

Developing Soft Skills & Personality
Dr. T Ravichandran

Non-verbal communication

12) Non-verbal communication is less intense and impactful than verbal communication.

Developing Soft Skills & Personality

Dr. T Ravichandran

Verbal communication

13) When we stop talking to somebody verbally, we stop the entire communication itself.

Developing Soft Skills & Personality
Dr. T. Ravichandran

Involuntary Body Language

14) Involuntary body language reveals a person's inner thinking or feelings.

Developing Soft Skills & Personality
Dr. T. R. Chandran

Time Perception

15) People maintain their appointments and meet deadlines according to their perceptions of time.

ANSWERS

True or False

1) Women have natural sensitivity towards body language than men.

Answer:

True

**2) A dishonest person avoids
eyecontact.**

Answer: Developing Soft Skills & Personality

Accessories:

Physical/Psychological Barriers?

- Do accessories enhance the effectiveness of communication or act as barriers?
- Clothing, body perfume, grooming, watch, bracelet, ear rings, nose-ring, necklace, make-up, dying of hair, moustache-type, hair-style type, belt, hand-bag, footwear: shoes, slippers; high-heels

Developing Soft Skills & Personality

Accessories:

Physical/Psychological Barriers?

- E.g., High-heels
- High-heels help maintaining eye-contact. The females do not have to look up to the male bosses!

Developing Soft Skills & Personality

But a diamond studded high-heels is a distracter!

Dr. T Ravichandran

Accessory Barrier

- *Any inappropriate accessory can cause barrier!*
- Clothing: Costly/Cheap; Branded; Over/skimpy
- Body perfume: Gender inappropriateness
- Watches, bracelet, ear rings, nose-ring, necklaces

Developing Soft Skills & Personality

Make-up, dying of hair, moustache-type, hair-style type

Dr. T Raychandi

Accessory adds to/ gives your personality!

**A shoe is not only a design,
but it's a part of your body language, the way you walk.
The way you're going to move is quite dictated by your shoes.**

**When a woman puts on a heel, she has a different posture,
a different attitude. She really stands up
and has a consciousness of her body.**
